SUMMARY

I create impactful digital experiences through custom web and mobile solutions. I help businesses, especially in healthcare, elevate their online presence and optimize operations using innovative, secure, and user-friendly applications. Leveraging React, Next.js, and Tailwind CSS, I deliver fast, scalable, and engaging digital platforms that transform ideas into powerful tools for growth.

PROJECTS & EXPERIENCE

Frontend Developer (Volunteer)   Jun 2024 - Present, Remote
Robin Reach TLD
- Designed and implemented a new responsive website using Figma, increasing user engagement by 40% and reducing bounce rate by 25%.
- Converted Figma designs to .erb pages with dark and light themes, improving accessibility and user satisfaction by 35%.
- Redesigned the dashboard/app with a clean, minimalistic approach, resulting in a 30% increase in daily active users and a 20% reduction in user onboarding time.
- Implemented smooth animations with a clean codebase, enhancing user experience and decreasing load time by 45%.
- Developed 5 key frontend features for the social management SaaS platform, contributing to a 30% increase in overall user engagement.

Frontend and Backend Code Reviewer   Apr 2022 - Dec 2023, Remote
Microverse
- Conducted over 1,500 detailed code reviews, emphasizing code clarity, adherence to UI/UX design principles, and best practices in React and Angular frameworks.
- Provided thorough and constructive feedback to 1,490+ project contributors, enhancing the functionality and user interface of web applications.
- Tested API integrations for 320+ React and Ruby on Rails capstone projects, ensuring seamless connectivity and optimal performance between front-end interfaces and back-end services.
- Ensured compatibility across 8 major web browsers and multiple mobile devices, maintaining a high standard of user accessibility.
- Utilized Git for version control and collaborative development, fostering an efficient and organized workflow for a team of 25+ developers.

Frontend Engineer   Dec 2022 - May 2023, Remote
Co.Lab 🚀 joincolab.io
- **Key Responsibilities:**
  - Developed 12 user-friendly interfaces using React, Redux, and TailwindCSS, resulting in a 20% increase in user satisfaction ratings.
  - Integrated 8 APIs to streamline data retrieval and display, achieving a 15% improvement in data loading times.
  - Conducted market research for 2 new products, resulting in feature enhancements that boosted user engagement by 25%.
  - Applied Agile methodologies in 8 sprints and 12 retrospectives, contributing to a 30% reduction in time-to-market for product features.

- **Projects:**
  - Parkinn: Developed an application to locate 150+ parking meters in San Francisco, focusing on intuitive design and real-time data integration.
  - Postcare: Built a post-surgery care app, emphasizing ease of use and accessibility for patients recovering from surgery.

EDUCATION

Computer Software Engineering   Dec 2023 - Present
1337 Coding School

Certificate Program, Full Stack Web Development   Jan 2022 - Jan 2023
Microverse

SKILLS

HTML5, CSS3, JavaScript, React, Next.js, AJAX, Tailwind CSS, Node.js, Express, MongoDB, PostgreSQL, Ruby On Rails, LESS, SASS, UI/UX Design, Responsive Design, Cross-Browser Compatibility, SEO Principles

CERTIFICATES

Google IT Support Certificate | **CS50's AP® Computer Science Principles** | **Co.Lab Software Development Certificate** | **FreeCode Camp Responsive Web Design**
